

Embedded Programme

A capability partner inside your organisation for the year

We embed inside your organisation for twelve months. We understand what is coming before it has been written into a brief, manage the pipeline, share market intelligence, and build your Cyber capability ahead of demand, not in reaction to gaps.

WHAT YOU GET

- A named senior partner who sits inside your team and knows your plans
- Roles shaped with you before they become briefs, so demand never surprises you
- A managed pipeline of specialists ready ahead of need
- Market and rate intelligence shared as standard
- Joint SLAs agreed together, and reviews held against them
- One commercial wrapper for the year, tailored to how you buy

WHEN IT FITS

- A security or technology function that is scaling
- A programme with rolling demand across the year
- A team tired of re-briefing a new supplier every hire
- A board that wants capability planned, not reactive

For any exclusive arrangement, we have a 100% hit rate.
