

Fractional Leadership

Board-level CISOs and CTOs, one to three days a week

Most organisations hit executive level problems long before they can justify an executive salary. A fractional CISO or CTO closes that gap: real seniority, a defined number of days, and outcomes you can hold them to, without the full-time cost.

WHAT THEY OWN

- CISO: security strategy at board level, and risk the board can act on
- CISO: ISO 27001, Cyber Essentials Plus and SOC 2 driven to certification
- CISO: incident readiness, supplier risk, insurer and customer assurance
- CTO: a technology strategy the board can invest behind
- CTO: engineering leadership, architecture and AI adoption grounded in reality
- CTO: technical due diligence for funding rounds and acquisitions

HOW YOU BUY IT

- Day rate: simple and flexible, start within weeks
- Retained: a fixed monthly retainer for a set number of days
- Statement of Works: a defined outcome at a fixed price
- A path to permanent when the need grows full time

All of the seniority, a fraction of the cost.
