

Statement of Works

A defined scope, a fixed price, milestones you can hold us to

You have a defined scope. We price it fixed, build the right team, and deliver against milestones. A senior Cyber project manager anchors the work: scoping it, validating quality, and signing off every stage. You know what you are getting and what it costs.

WHAT YOU GET

- A fixed price agreed before any work starts
- A senior Cyber project manager accountable end to end
- The right team assembled for the scope, not whoever is spare
- Milestone based delivery with sign off at every stage
- Quality validated before you are asked to accept anything
- A clean handover with the documentation to stand on its own

WHEN IT FITS

- Audit findings that need remediating to a deadline
- A certification push: ISO 27001, Cyber Essentials Plus, SOC 2
- A migration or security uplift with a clear end state
- Any outcome you want priced before you commit

One destination, one price, one accountable owner.
